Helmet use can reduce the risk of severe brain injuries by up to 88%.

A child riding with other kids or adults wearing helmets is more likely to wear a helmet.

Children should always wear a helmet for all wheeled sports activities, like riding scooters, skateboarding and longboarding.

A child riding without a helmet increases the risk of sustaining a head injury and being involved in a crash by 14 times.

The right way to wear it: 2V1
- 2 fingers above the eyebrows
- 1 finger between strap and chin
- Straps form a “V” under the ears
